OUR COMMITMENT TO SUSTAINABILITY IS BUILT INTO EVERYTHING WE DO

As a forward-looking company in the pioneering state of California, SDG&E is closely aligned with our state's bold climate and environmental agenda.

Our approach to sustainability means:

Reducing our carbon footprint

Fostering energy innovation and conservation

Encouraging our employees and the communities we serve to take daily action to ensure a sustainable energy future for generations to come

Long-term goals rooted in California's landmark climate policies

By 2022

- Place two green hydrogen projects into service to offer long duration energy storage and reduce carbon intensity

By 2025

- Develop an energy-industry leading supply chain sustainability program
- Pilot a Virtual Power Plant to reduce GHG emissions

By 2030

- Divert 100% of our organic green waste from entering landfills
- Increase recycled water use to at least 90% at all facilities
- Electrify 100% of the Light Duty Fleet
- Transition 30% of overall fleet to Zero Emission Vehicles
- Mitigate direct emissions from gas-fired generation

Driving progress to help California achieve its bold climate and environmental agenda

- Focusing on environmental stewardship with no coal contracts
- Innovating our grids to reduce emissions
- Steadily evolving robust wildfire mitigation operations
- Implementing an aggressive vehicle electrification plan
- Managing natural gas system to reduce leaks
- Expanding clean technology portfolio with energy storage, microgrids and hydrogen

Committed to moving climate action forward in San Diego

- Collaborated with the City on clean transportation efforts, integration of more rooftop solar, and increased penetration of clean energy
- Supported the City's Climate Action Plan
- Contributed to the City's progress in its 2019 Climate Action Plan Annual Report through clean energy efforts, clean transportation efforts, and green jobs
- Transitioning to CCA to support our future shared customers with San Diego Community Power

Our sustainability strategy will guide us in our mission to build the cleanest, safest and most reliable energy infrastructure company in America
